Art Sequence of Lessons

Know It!

Review of Prior Learning

Children to have opportunities to demonstrate their previous learning through a range of activities through cross curricular links or stand alone lessons.

Link It!

Introducing the Focus of the Unit

Children are to discuss their new artist, strand and art element, linking to prior skills and knowledge retained. Children will also look at art work from linked artists to widen their knowledge of the art world.

Learn It!

New Skills and Knowledge

Within the unit of learning in Art, children should be provided opportunities to learn new art skills that are appropriate for their chosen strand, artist and elements. The appropriate sequence of lessons are as follow:

1. Introduction to the Artist/Focus
2. Practice new skills using a range of media and materials
3. Design their final piece e.g sculpture, sketch, painting

All Art lessons should be recorded in their sketch pads where children should record their learning through small explanations, responses to artwork and comments about their own work.

Check It!

Pupils should have opportunities throughout the unit to demonstrate what they are presently being taught, this will check that all children are keeping up and misconceptions can be addressed.

Show It!

End Point

Children should "Show!" their taught knowledge through their final piece they create, demonstrating their skills and techniques. Children should also complete a self-evaluation of their final piece to explain their gained knowledge.
